```python
1    """""Example environment diagram for conditionals."""""
2
3    secret: int = 3
4    guess: int = 1
5
6    if guess == secrets
7    |    print ("Success!")
8    |    print (str (guess) + " is the secret number!")
9    else:
10   |    guess = guess + 1
11   |    if guess == secret :
12   |    |    print ("success on 2nd try!")
13   |    else:
14   |    |    print ("wrong guess. :( ")
15   |    |    if (guess == secret -1):
16   |    |    |    print ("Hint: The guess of " + str (guess) + "is off by only one number!")
```

Stack

Globals	
secret	3
guess	~~1~~ 2

Output

"wrong guess. :("
"Hint: the guess of 2 is off by only one number!"
